

Max Lean Daytime

Synergistic Metabolic Activator

Getting Lean Just Got a Little Easier!

MMSN is proud to introduce the newest addition to the Max Lean family of products, **New Max Lean Daytime**. Using the latest in high tech metabolic and fat burning ingredients we've created a unique one of a kind formula. To maximize fat loss you have to increase calorie burning above calorie consumption. Ideally you want to mobilize body fat, increase metabolic rate and energy levels, support thyroid function, and provide thermogenic precursors to support your fat loss efforts.

For the **New Max Lean Daytime** we took the latest scientific research and created an amazing blend of herbs and nutrients to help you reach your physique goals. We started with a form of Citrus aurantium known as AdvantraZ™, patented for burning fat, suppressing appetite, and preserving lean muscle mass while you are dieting. We did not just add a little AdvantraZ™, we put in a full 60mg per serving, no one else even comes close. Then we added a highly potent form of Green Tea containing clinically studied amounts of EGCG (epigallo catechin gallate). Research shows that 270mg of EGCG per day increases metabolism and burns more calories. EGCG works by prolonging the effects of epinephrine, a chemical released in the body during exercise and from Citrus aurantium. Epinephrine increases metabolism and releases body fat for energy. Caffeine is added to help mobilize even more fat for energy and provide a boost for your workouts and daily activities. We didn't forget about your thyroid. When you diet and train hard your body will often try to slow your metabolism by decreasing thyroid production. To combat this thyroid decline we added Guggulsterones researched for their ability to support thyroid function during calorie restriction as well as supporting healthy cholesterol levels. The last core ingredient is L-Tyrosine. This amino acid supplies the fuel for supercharging the metabolic machine. If you increase metabolism with the core ingredients AdvantraZ™, Green Tea EGCG, and Caffeine you need to provide the fuel for continued thermogenic activity. L-Tyrosine is the fuel for the metabolic stimulator epinephrine. As mentioned, epinephrine is stimulated by the combination of the core ingredients in **New Max Lean Daytime** and exercise. Without L-Tyrosine you might as well have the fastest car with an empty fuel tank. All of the other supportive ingredients in the **New Max Lean Daytime** play a role in making this one of the most advanced metabolic formulas available on the market today. We are convinced you'll see the difference in less than thirty days! Getting lean just got a little easier with **New Max Lean Daytime!**

Size: 120 Capsules
Serving Size: Two (2) Capsules
Servings Per Container: 60

KEY FEATURES

- Increase Metabolism†
- Suppresses Appetite†
- Maintains Lean Muscle†

KEY MESSAGES

- Max Lean Daytime mobilizes body fat, increases metabolic rate and energy levels, supports thyroid function and provides thermogenic precursors to support fat loss.
- Advantra Z patented for burning fat, suppressing appetite and preserving lean muscle while dieting.
- Contains more Advantra Z than most leading brands, a full 60mg per serving.
- Highly potent form of Green Tea contains clinically studied amounts of EGCG. Research indicates that 270mg of EGCG per day increases metabolism and burns more calories.
- Caffeine added to help mobilize even more fat energy providing a boost for your workouts and daily activities.
- 25 mg of Guggulsterones researched for their ability to support thyroid function during calorie restriction and support of healthy cholesterol levels.
- 200mg of Tyrosine the amino acid responsible for supplying the fuel for the metabolic stimulator epinephrine.

TARGET MARKET

Primary: Individuals interested in accelerating fat loss and losing weight.

Secondary: Individuals wishing to suppress appetite due to calorie-restricted diets.

RECOMMENDED STACK

- Max Lean 24 Hour System (EF, NS and Nighttime)
- Max CLA
- Max Cleanse & Lean
- Max Carb & Fat Away
